

### Who Is On Your Site?

**Eyes On Site™** keeps a photographic and sensor record of your remote site that you can view from any web browser, with events and optional alarms when it is approached, touched or moved.

People, vehicles or animals entering your site? Something missing or damaged? Know who and when. Production problems, missing pig, need to read a gauge? It's on your browser, with history!

### Easy and Effective Security for Well Sites, Pipelines, and Field Equipment

- Improve safety and security while reducing site visits and windshield time
- Camera shows site overview, or read visible gauges with 1080p clarity
- Vibration Sensor records production, swing gate opening, or the pig going by
- Built-in GPS locates all your Eyes On Site™ modules – even if they are stolen!
- Proximity detector triggers the camera if Eyes On Site™ is approached
- Alarms can be sent by text message to an operator's cell phone *with a picture!*

### Works on Your Site

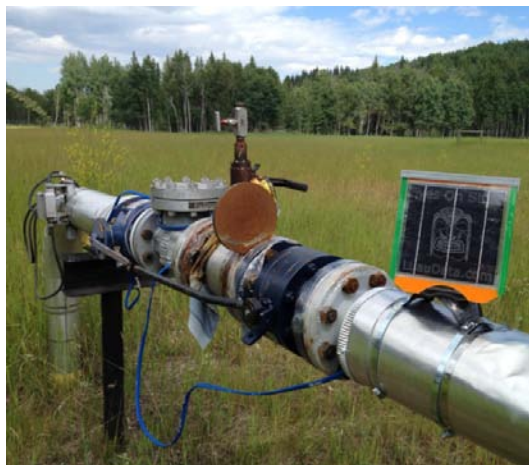

- Mount on any pipe or fence rail, or even a tree branch
- Built-in solar panels recharge the batteries each day to run 24/7 unattended for years
- Tough polycarbonate shell sheds rain, snow and hail.
- "Certified" model is Class 1 Div 2 (Zone 2) safe for hazardous locations
- Connects via carrier cell service. Eyes On Site works wherever your cell phone does.

### Installs in 5 Minutes

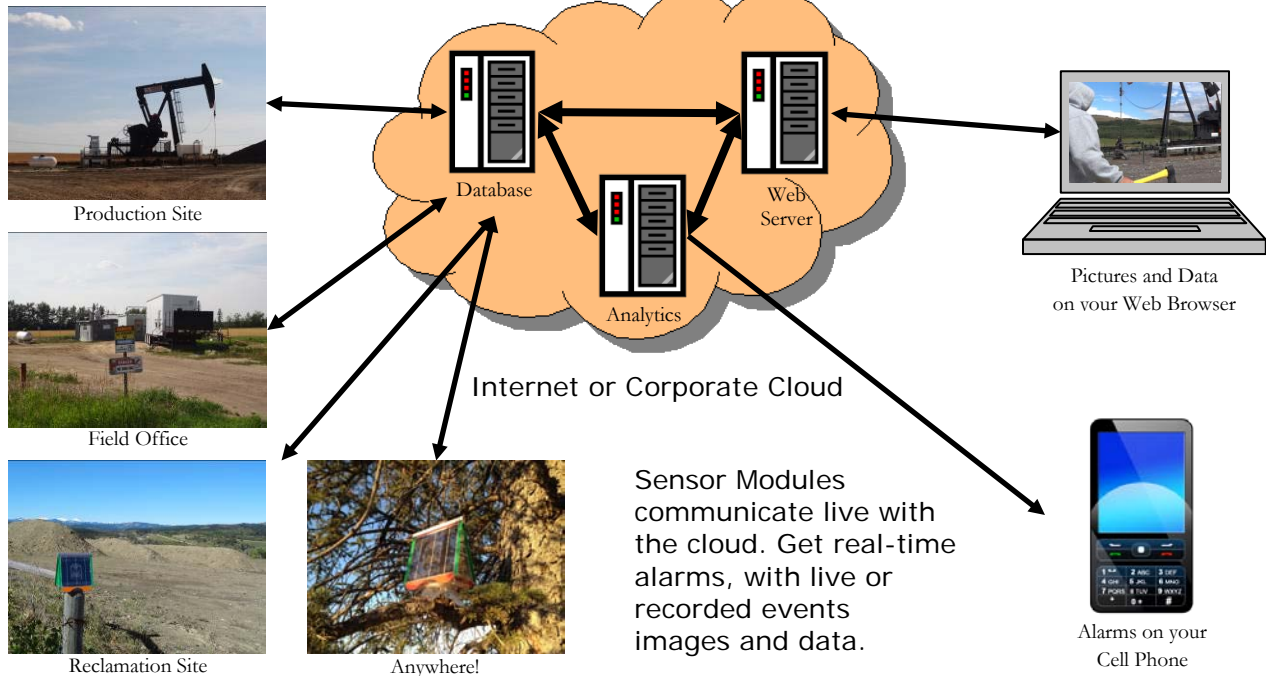

- Attach with pipe clamps or zip straps, or screw to a rail
- Aim it where you want it; module swivels and elevates on its base, and locks in position.
- Turn on the unit - it locates itself on the map and configures automatically.
- No external antenna. Uses the latest 4G long-range cell data service.

### Simple and Self-Contained

- Eyes On Site™ Sensor Modules include solar panels, batteries, camera, sensors, GPS, data communications, and swivel mount all in one simple package.
- And... your data is safe in the cloud, no matter what happens on site!

## Eyes On Site™ System

### EOS-100 Sensor Module

Self-contained unit that operators can install themselves in 5 minutes. Solar-powered to run for years in any weather, communicates over the carrier cell data network.

Size: (h,w,d) 20,20,10 cm, or 8,8,4 in  
 Weight: approx 1 kg  
 Sensors: camera, motion, proximity, GPS  
 Temperature: -40C to +70C (+40C after sunset)  
 Geographic: 60° S to 60° N (due to day length)  
 Safety Rating: Class 1 Div 2 (Zone 2)

### Eyes-On Web Interface

View real-time images, events, alarms and sensor data direct from the field, or search and view historical data from the cloud. Sensor modules located by map, pick-list or

search, by lat/long or LSD. Works on desktop, tablet and phone browsers.

Turn-key system includes password security, or host the entire solution behind your corporate firewall.

### Order Today, Install Tomorrow!

Order online at [LuauData.com](http://LuauData.com). You can install Eyes On Site™ next day!

Or, call our operator at 1-888-450-4036 and ask to speak to the order desk.

You will need to create an account first. The account initializes your Cloud Services, so field modules can self-configure when they are installed on your site.

### Would you like a visit?

Call our operator at 1-888-450-4036 and we would be happy to visit your office for an in-person demo, and to discuss hosting and storage, service plans, field trials, and bulk purchase.
